Contents

Plenary Lectures

PL01 **R. Huber,** Max Planck Institut für Biochemie, 82152 Martinsried, Germany
Proteins and Metals, Their Functional and Structural Interaction in Metalloproteins / **2**

PL02 **K. D. Karlin,** Department of Chemistry, The Johns Hopkins University, Baltimore, Maryland 21218, USA
Copper-Dioxygen Complexes: Functional Models for Proteins / **3**

PL03 **P. J. Sadler,** Department of Chemistry, University of Edinburgh, West Mains Road, Edinburgh EH9 3JJ, UK
Metal Complexes in Medicine: Design and Mechanism of Action / **4**

PL04 **J. K. Barton,** Division of Chemistry and Chemical Engineering, California Institute of Technology, Pasadena, California 91125, USA
DNA-Mediated Electron Transfer Chemistry / **5**

PL05 **T. Kitagawa,[a] T. Ogura,[a] S. Hirota,[a] D. A. Proshlyakov,[a] J. Matysik,[a] E. H. Appelman,[b] K. Shinzawa-Itoh,[c] and S. Yoshikawa,[c]** [a]Institute for Molecular Science, Okazaki National Research Institutes, Myodaiji, Okazaki 444, Japan; [b]Chemistry Division, Argonne National Laboratory, Argonne, Illinois 60439, USA; and [c]Department of Life Science, Faculty of Science, Himeji Institute of Technology, 1479-1, Kanaji, Kamigoricho, Akougun, Hyogo 678-12, Japan
Time-Resolved Resonance Raman Study of Dioxygen Reduction by Cytochrome *c* Oxidase / **6**

(A) Molybdenum

A01 **E. I. Stiefel**
Transition Metal Sulfur Chemistry and Its Relevance to Molybdenum and Tungsten Enzymes / **8**

A02 **I. Lane, P. S. Solomon, A. L. Shaw, A. S. McAlpine, G. R. Hanson, S. Bailey, and A. G. McEwan**
EPR and X-Ray Crystallographic Studies of Dimethylsulfoxide Reductase from *Rhodobacter capsulatus*: Implications for Electron Transfer and Catalysis / **9**

A03 **N. Ueyama, K. Baba, H. Oku, T. Okamura, and A. Nakamura**
Distorted Monooxomolybdenum(IV) Model Complexes with Intramolecular NH---S Hydrogen Bond for Molybdenum Oxidoreductases / **10**

A04 **T. Yonemura, K. Okamoto, T. Ama, H. Kawaguchi, and T. Yasui**
Structures and Reactivities of Dinitrosyl-Molybdenum Complexes with Some Thiolate Ligands / **11**

A05 **K. Unoura, A. Yamazaki, K. Ito, and Y. Kato**
Oxygen Atom Transfer between *cis*-Dioxomolybdenum(VI) Complex with Quadridentate Dithiocarbamato Ligand and PPh_3 / **12**

A06 **P. N. Palma, L. Krippahl, M. J. Romão, I. Moura, J. E. Wampler, and J. J. G. Moura**
Modeling Macromolecular Interactions: Study of the Complex Aldehyde Oxido-Reductase and Flavodoxin / **13**

A07 **H. Oku, B. P. Koehler, N. Ueyama, A. Nakamura, and M. K. Johnson**
MCD Spectroscopy of W(V) and Mo(V) Dithiolato Complexes: Implications for the Coordination Geometry of the Mo/W Active Sites of Oxotransferases / **14**

A08 **M. S. Mondal, A. K. Sau, and S. Mitra**
Mechanism of the Inhibition of the Xanthine Oxidase Activity by Cu^{2+} Ion / **15**

A09 **M. J. Almendra, O. Gavel, R. O. Duarte, J. Caldeira, S. A. Bursakov, C. Costa, I. Moura, and J. J. G. Moura**
A Comparative Study on New Molybdoenzymes—Formate Dehydrogenases from *Desulfovibrio gigas* and *Desulfovibrio desulfuricans* ATCC 27774 / **16**

© 1997 Elsevier Science Inc.

655 Avenue of the Americas, New York, NY 10010

0162-0134/97/$17.00
PII S0162-0134(97)00078-0

(B) Metal Uptake, Transport, and Storage

B01 **D. J. Thiele**
Copper Homeostasis in Yeast Cells / **18**

B02 **E. D. Harris, M. C. M. Reddy, and Y. Qian**
Copper Transporting ATPases: Function and Regulation of Genetic Expression / **19**

B03 **D. M. Templeton and J. G. Parkes**
The Role of Iron in Regulating Gene Expression / **20**

B04 **K. T. Suzuki, Y. Shiobara, K. Ishiwata, and M. Ohmichi**
Speciation by HPLC/ICP-MS with Use of Stable Isotopes: Chemical Reactions in the Metabolism of Selenium Administered as Selenite / **21**

B05 **R. Hirunuma, N. Sotogaku, K. Endo, S. Enomoto, S. Ambe, and F. Ambe**
Application of the Multitracer Technique: Metabolic Study of Trace Elements in Selenium-Deficient Rats / **22**

B06 **N. Sotogaku, R. Hirunuma, K. Endo, S. Enomoto, S. Ambe, and F. Ambe**
Studies of the Binding of Various Trace Elements to Blood Components and Serum Proteins by Means of the Multitracer Technique / **23**

B07 **E. Suzuki, M. Aoki, and K. Uchiyama**
Analysis of Regulatory Mechanism of Sulfate Permease Expression in Cyanobacteria / **24**

B08 **J. Hirose, I. Fujiwara, K. Iio, and H. Iwamoto**
The Dependence of Copper Dissociation Rate Constants from Human(serum) and Ovo-Transferrin for pH and Anion / **25**

B09 **Y. Ogra, I. Sadakata, M. Ohmichi, and K. T. Suzuki**
Selective Removal of Copper Bound to Metallothionein in the Liver of LEC Rats by Tetrathiomolybdate / **26**

B10 **S. Enomoto, R. G. Weginwar, R. Hirunuma, S. Ambe, and F. Ambe**
Metabolic Study of Trace Elements in Acute Alcoholic Mice / **27**

B11 **S. Enomoto, B. Liu, S. Ambe, R. Amano, and F. Ambe**
Accumulation of Inorganic Elements in ddY Mice Implanted with Ehrlich Sarcoma / **28**

B12 **N. Hayakawa, S. Enomoto, R. Hirunuma, K. Endo, S. Ambe, and F. Ambe**
Metabolic Study of Trace Elements in Liver Cancer Bearing Rat / **29**

B13 **E. C. Theil and B. H. Huynh**
Ferritin Mineralization: Ferroxidation and Beyond / **30**

B14 **A. Tsubouchi, C. Kanno, and M. Akiyama**
Enterobactin Model Compounds (LYSCAMs): Iron Transport to Microorganisms and Iron Removal from Transferrin / **31**

B15 **L. Koh, J. Ranford, W. Robinson, J. Svensson, and Y. Wang**
Bis-tridentate Iron Chelating Analogues of Pyridoxal Isonicotinoyl Hydrazone / **32**

B16 **K. Matsumoto, T. Ozawa, K. Jitsukawa, H. Masuda, and H. Einaga**
Effect of Intramolecular Hydrogen Bonds on the Thermodynamic Stabilities of the Iron(III) Complexes with Novel Tripodal Ligands / **33**

B17 **Y. Yamada, N. Ueyama, T. Okamura, S. Kubo, K. Yamaguchi, and A. Nakamura**
Strong Binding of Ca^{2+} Ion by Intramolecularly Hydrogen Bonded Carboxylate Ligand / **34**

(C) Copper

C01 **L. Banci**
Structure–Function Relationship in Superoxide Dismutase / **36**

C02 **C. D. Borman, C. G. Saysell, C. Wright, and A. G. Sykes**
Mechanistic Studies on Galactose Oxidase / **37**

C03 **J. A. Halfen, S. Mahapatra, L. Berreau, B. A. Jazdzewski, V. G. Young, Jr., L. Que, Jr., S. Kaderli, A. D. Zuberbühler, and W. B. Tolman**
Understanding the Oxidation Chemistry of Copper Protein Active Sites: Copper Complexes That Activate Dioxygen or Stabilize Phenoxyl Radicals / **38**

C04 **J. W. Whittaker**
Radical Copper Oxidases, One Electron at a Time / **39**

C05 **P. Lindley, I. Zaitseva, V. Zaitsev, A. Ralph, and G. Card**
The Structure of Human Ceruloplasmin at 3.0 Å Resolution: A Putative Role of the Protein as a Ferroxidase in the Plasma / **40**

C06 **A. Harrenga, S. Iwata, C. Ostermeier, and H. Michel**
Structure and Function of the Cytochrome c Oxidase from Paracoccus denitrificans / **41**

C07 **S. Yoshikawa, T. Tsukihara, and K. Shinzawa-Itoh**
Crystal Structure of Bovine Heart Cytochrome c Oxidase / **42**

C08 **K. Pierloot, J. O. A. De Kerpel, M. H. M. Olsson, U. Ryde, and B. O. Roos**
The Correlation between Structure and Spectra of Blue Copper Proteins / **43**

C09 **T. Inoue, S. Suzuki, N. Nishio, S. Hamanaka, K. Yamaguchi, K. Kataoka, T. Kohzuma, and Y. Kai**
Comparison between the Oxidized and the Reduced Structures of Pseudoazurin from *Achromobacter cycloclastes* IAM1013 / **44**

C10 **T. Kohzuma, N. Horikoshi, S. Suzuki, S. Nagatomo, and T. Kitagawa**
Electron-Transfer Reactions and Resonance Raman Spectroscopic Studies of Two Distinct Azurins from *Alcaligenes xylosoxidans* NCIB 11015 / **45**

C11 **N. Horikoshi, S. Nagatomo, T. Kitagawa, and T. Kohzuma**
Resonance Raman Spectroscopic Studies of a Copper-Containing Nitrite Reductase from the *Alcaligenes xylosoxidans* NCIB 11015 / **46**

C12 **T. Kohzuma, T. Inoue, Y. Sasakawa, M. Gotowda, K. Onodera, Y. Iimura, Y. Sugimura, F. Yoshizaki, and Y. Kai**
Functional and Structural Studies of a Novel Plastocyanin from the Fern Plant *Dryopteris crassirhizoma* / **47**

C13 **H. Tsukui, E. Suzuki, S. Nagatomo, T. Kitagawa, Y. Sugimura, F. Yoshizaki, and T. Kohzuma**
Gene Expression and Characterization of a Novel Plastocyanin from the Cyanobactrium *Synechococcus* sp. PCC7942 / **48**

C14 **G. Fraczkiewicz, A. R. Nersissian, J. P. Hart, J. S. Valentine, and R. S. Czernuszewicz**
A pH-Dependent Resonance Raman Study on Blue Copper Site of Cucumber Stellacyanin and Its Gln→Met Variant / **49**

C15 **S. Maritano, A. Marchesini, K. Kataoka, A. Kondo, and S. Suzuki**
Spectroscopic Characterization of Mavicyanin and [Met86Gln]Pseudoazurin Mutant / **50**

C16 **R. W. Strange, L. M. Murphy, F. E. Dodd, R. R. Eady, Z. H. L. Abraham, B. E. Smith, and S. S. Hasnain**
The Structural Similarity between the Reduced Type 2 Cu Centre of a Blue Nitrite Reductase and the Cu(I) Centre of Cu-Zn Superoxide Dismutase: Implications for the Catalytic Mechanism of NIR? / **51**

C17 **E. Agostinelli, G. De Matteis, B. Mondovì, and L. Morpurgo**
Characterisation of Co(II)-Substituted Bovine Serum Amine Oxidase / **52**

C18 **K. Tanizawa and M. Mure**
Coordination of Copper in Bacterial Amine Oxidase and Its Role in the Biogenesis of TOPA Quinone Cofactor / **53**

C19 **K. Takahashi, T. Onami, and M. Noguchi**
Deuterium Kinetic-Isotope Effects in Peptidylglycine α-Amidating Monooxygenase Reaction / **54**

C20 **N. Abudu, M. B. Yerdaw, and T. Ljones**
The Number of Copper Atoms per Active Site in Dopamine β-Monooxygenase / **55**

C21 **A. Shimizu, T. Sakurai, S. Yamaguchi, and T. Samejima**
Mutation of Bilirubin Oxidase by Protein Engineering for Elucidating Electron Pathway / **56**

C22 **T. Sakurai, H. Huang, H. Monjushiro, and S. Takeda**
SQUID and EPR of the Trinuclear Center in Laccase and Ascorbate Oxidase / **57**

C23 **T. Saito, A. Hata, M. Okabe, M. Kurasaki, T. Hosokawa, F. Endo, K. Nagano, and K. Saito**
Distribution of the Copper Transporting P-Type ATPase *(ATP7B)* in the Kidney, Brain and Liver of the Rat / **58**

C24 **K. Katayama, M. Kodera, and K. Kano**
Functional Model of Hemocyanin: Reversible Binding of Dioxygen Molecule by a Dicopper(I) Complex of a 6-Methylhexapyridine Ligand / **59**

C25 **S. Imai, S. Suzuki, K. Fujisawa, and Y. Moro-oka**
Synthesis and Characterization of Copper(I)- and Silver(I)-Thiolate Complexes / **60**

C26 **M. Vaidyanathan, R. Viswanathan, M. Palaniandavar, T. Balasubramanian, P. Prabakaran, and T. P. Muthiah**
Novel Copper(II) Complexes with Unusual Axial Phenolate Coordination as Structural Models for the Active Site in Galactose Oxidase: X-Ray Crystal Structures and Spectral and Redox Properties of [Cu(bpnp)X] Complexes / **61**

C27 **M. Kodera, Y. Tachi, K. Kano, M. Ohba, H. Okawa, M. Koikawa, and T. Tokii**
Structural Model of pMMO: Synthesis, Crystal Structures, and Magnetic Properties of Trinuclear Copper(II) Complexes / **62**

C28 **T. Okuno, S. Ohba, and Y. Nishida**
Oxygenation Reaction of Cyclohexane Catalyzed by Copper(II) Complex and Hydrogen Peroxide System / **63**

C29 **T. Kita, M. Kodera, M. Taki, and K. Kano**
Copper(I) and (II) Complexes of Tridentate and Tetradentate Ligands Containing a Sulfur Donor as Functional Models of Dopamine β-Monooxygenase / **64**

C30 **S. Itoh, H. Nakao, and S. Fukuzumi**
Mechanistic Studies of Aliphatic Ligand Hydroxylation of a Copper Complex by Dioxygen: A Model Reaction for Copper Monooxygenases / **65**

C31 **H. Hayashi, S. Fujinami, M. Suzuki, K. Tanaka, and A. Uehara**
Dioxygen-Reactivity of a Copper(I) Complex with Tris(6-methyl-2-pyridylmethyl)amine / **66**

C32 **M. Y. Hamed**
Copper Complexes with Biologically Significant Ligands: Rapid Kinetic and Thermodynamic Equilibrium Study of the Cu(II) Complexes with Glutathione, L-Cysteine and D-Penicillamine / **67**

C33 **P. Bera, R. J. Butcher, and N. Saha**
Synthesis, Spectroscopy and X-Ray Crystal Structure of a Copper(II) Complex with Potentially Therapeutic S-Benzyl Dithiocarbazate of 5-Methyl-3-formyl Pyrazole: A Novel Instance of Copper(II) Promoted Nucleophilic Substitution on Azomethine Function / **68**

C34 **J. Setsune and T. Yokoyama**
Synthesis and Structure of Cu Complexes of Pyrrole-Containing Tripodal Ligands / **69**

C35 **T. Murakami and S. Kita**
Trigonal Bipyramidal Copper(II) Complexes Containing an Amino Acid and a Linear Triamine / **70**

C36 **R. D. Köhn, G. Seifert, and G. Kociok-Köhn**
Triazacyclohexane Complexes with Biological Relevance / **71**

C37 **K. Yamato, T. Suekuni, and Y. Kojima**
Preparations and Characterization of Non-Porphine Copper Protein Models with Pseudopeptides / **72**

C38 **A. Wada, M. Harata, K. Hasegawa, K. Jitsukawa, H. Masuda, and H. Einaga**
Structural and Spectroscopic Characterization of Hydroperoxo Mononuclear Copper Complexes with Tripodal Pyridylamine Ligands / **73**

C39 **K. Fujisawa, S. Yasui, and Y. Moro-oka**
Reaction Mechanism of Tyrosinase Catalysis / **74**

C40 **É. Balogh-Hergovich, J. Kaizer, G. Speier, G. Huttner, and L. Zsolnai**
Ligand- and Solvent-Dependence of the Reaction of Copper Flavonolate 1,10-Phenanthroline Complexes with Dioxygen / **75**

C41 **J. J. Goto, J. A. Roe, E. B. Gralla, and J. S. Valentine**
Human Copper-Zinc Superoxide Dismutase Mutants of Familial ALS: A Relationship between Bioinorganic Chemistry and Human Disease / **76**

(D) Heme Iron and Metalloporphyrins

D01 **V. Fülöp, P. Williams, S. Baker, N. Saunders, A. Koppenhöfer, J. W. B. Moir, M. D. Page, Y. Sambongi, J. Hajdu, and S. J. Ferguson**
Cytochrome cd_1 Nitrite Reductase of Denitrification; A Haem Enzyme with an Unusual Structure and Intriguing Biogenesis / **78**

D02 **V. Jayaraman, K. R. Rodgers, I. Mukerji, X. Hu, and T. G. Spiro**
Metal Coordination and Protein Dynamics: The Allosteric Reaction Coordinate in Hemoglobin / **79**

D03 **M. Tanaka, A. Morimoto, K. Ishimori, and I. Morishima**
Mechanism of Peroxidase Activity as Studied with Some Recombinant Horseradish Peroxidases / **80**

D04 **A. X. Trautwein, H. Winkler, H. Grünsteudel, W. Meyer-Klaucke, O. Leupold, D. Rüter, E. Gerdau, M. Haas, E. Realo, D. Mandon, and R. Weiss**
Iron Porphyrins Reinvestigated by a New Method: Mössbauer Spectroscopy Using Synchrotron Radiation / **81**

D05 **A. Morimoto, M. Tanaka, K. Ishimori, and I. Morishima**
The Function and Structure of Horseradish Peroxidase Mutants Analogous to Cytochrome *c* Peroxidase / **82**

D06 **M. Tanaka, K. Ishimori, and I. Morishima**
Relationship between the Heme Active Site of *Arthromyces ramosus* Peroxidase and Its Oxidation Activity for Luminol / **83**

D07 **G. Smulevich, F. Neri, C. Indiani, B. Baldi, and K. G. Welinder**
Electronic Absorption and Resonance Raman Spectra of Site-Directed Mutants of *Coprinus cinereus* Peroxidase / **84**

D08 **I. M. Kooter, N. Moguilevsky, A. Bollen, M. Sijtsema, K. Otto, and R. Wever**
Site-Directed Mutagenesis of Residues at the Substrate Binding-Site of Myeloperoxidase / **85**

D09 **T. Matsui, S. Ozaki, and Y. Watanabe**
Roles of the Location of Distal Histidine in the Oxidation Activities of Myoglobin / **86**

D10 **S. Ozaki, Y. Inada, and Y. Watanabe**
Catalytic Intermediates of Polyethylene Glycolated Horseradish Peroxidase in Organic Media / **87**

D11 **I. Moura, S. Prazeres, C. Moreno, H. Lopes, G. Pettigrew, and J. J. G. Moura**
The Mechanism of Activation of Cytochrome *c* Peroxidase from *Paracoccus denitrificans* / **88**

D12 **S. Yoshioka, K. Ishimori, and I. Morishima**
The Proximal Ligand Substitution in Cytochrome P450cam by Site-Directed Mutagenesis / **89**

D13 **F. Tani and Y. Naruta**
Synthesis and Property of an Ultimate P-450 Model; Iron Porphyrin Bearing OH Groups and a Thiolate Ligand in the Cavities above the Heme / **90**

D14 **S. Moriyama, N. Nishikawa, T. Ueno, N. Ueyama, and A. Nakamura**
P-450- and Chloroperoxidase-Model Complexes with Cys-Containing Tetrapeptides / **91**

D15 **Y. J. Lee and W. Nam**
High-Valent Iron Oxo Porphyrin Complex in the Epoxidation of Olefins by an Iron(III) Porphyrin and Hydrogen Peroxide in Aprotic Solvent / **92**

D16 **S. J. Yang, H. J. Lee, and W. Nam**
Epoxidation of Olefins by Water-Soluble Iron Porphyrin Complexes with Hydrogen Peroxide and Hydroperoxides in Aqueous Solution / **93**

D17 **G. Y. Mee, K. A. Lee, and W. Nam**
Reactions of Iron Porphyrin Complexes with Hydroperoxides: Reactive Intermediate, Competitive Epoxidation, and O–O Bond Cleavage / **94**

D18 **K. Ichihara and Y. Naruta**
Synthesis and Characterization of High-Valent Mn Porphyrin Dimers, and Their Oxidation Properties / **95**

D19 **Y. Goto, S. Wada, Y. Watanabe, and I. Morishima**
Oxidation of Aldehydes by Ferric Peroxo Porphyrin Complexes / **96**

D20 **T. Murakami, Y. Watanabe, and I. Morishima**
New Oxidation Reaction of an Iron Porphyrin Complex Related to Heme Catabolism / **97**

D21 **S. Nakagaki, C. R. Xavier, A. S. Mangrich, and A. J. Wosniak**
Study of Metalloporphyrins Synthesis in the Presence of Zeolites / **98**

D22 **T. Uno, M. Shikishima, M. Shoji, M. Tsuji, and S. Shimabayashi**
Depurination of Adenosine Monophosphates in the Iron Porphyrin-Cumene Hydroperoxide System / **99**

D23 **S. Nakajima, T. Takanami, F. Hino, R. Hirabe, M. Ueno, and K. Suda**
Metalloporphyrins as an Efficient Catalyst for the Regioselective Rearrangement of Epoxides into Carbonyl Compounds / **100**

D24 **B. Zhan and X.-Y. Li**
A Novel and Efficient Mimic of Cytochrome P-450: Nano-Inclusion of Metalloporphyrin in Zeolites by Molecular Recognition between Host and Guest / **101**

D25 **T. Sagawa, T. Yomo, E. K. Mitamura, S. Tsugawa, Y. Takeda, I. Urabe, H. Ihara, and K. Ohkubo**
Novel Versatility of Catalase I for Dioxygenase Reactions / **102**

D26 **T. Iwasaki, H. Hori, Y. Hayashi, and T. Nishino**
Heme-Binding Domain and the Threonine Mutants of Mouse Neuronal Nitric Oxide Synthase / **103**

D27 **U. P. Singh, E. Obayashi, S. Takahashi, T. Iizuka, H. Shoun, and Y. Shiro**
Effects of Heme Substitution on Spectral and Functional Properties of Cytochrome P450nor / **104**

D28 **N. Sakurai and T. Sakurai**
Isolation and Characterization of Nitric Oxide (NO) Reductase from a Denitrifying Bacterium, Paracoccus halodenitrificans / **105**

D29 **A. Koppenhöfer, K. Kobayashi, S. Tagawa, and S. J. Ferguson**
Pulse Radiolysis Studies on Cytochrome cd_1 Nitrite Reductase from T. pantotropha: Evidence for a Fast Intramolecular Electron Transfer from *c*-Haem to d_1-Haem / **106**

D30 **T. Ogura, Y. Kobayashi, K. Shinzawa-Itoh, S. Yoshikawa, and T. Kitagawa**
A pH Dependent Polarity Change at the Heme a_3-Cu_B Site of Bovine Cytochrome *c* Oxidase Probed through the Fe–CO Stretching Raman Band / **107**

D31 **Y. Naruta, T. Sasaki, and N. Nakamura**
Synthesis of Cu-TPA Linked Hemes and Their O_2 Complexes as a Cytochrome *c* Oxidase Model / **108**

D32 **B. Schoepp, A. Riedel, and W. Nitschke**
The Electrochemical Properties of the Individual Hemes in the Tetraheme Cytochromes Associated to the Photosynthetic Reaction Centres in Purple Bacteria / **109**

D33 **M. Kobayashi, N. Ishida, H. Kise, M. Mimuro, M. Koizumi, T. Watanabe, and H. Kano**
An *in Vitro* Model for the Reaction Center Special Pair of PSI with a Chlorophyll *a'* Dimer / **110**

D34 **C. Costa, B. Devreese, J. Van Beeumen, V. Papaefthymiou, A. Simopoulos, J. J. G. Moura, and I. Moura**
Split-Soret Cytochrome *c* from *Desulfovibrio desulfuricans* ATCC 27774, a Novel Protein That Contains Both Heme and Non-Heme Iron Centers / **111**

D35 **H. Fujii, M. G. Finnegan, and M. K. Johnson**
EPR and MCD Studies on Cytochrome b_{558} in Neutrophils: Modulation of the Heme Structure and Its Superoxide ($O_2\cdot^-$)-Generating Function / **112**

D36 **Y. Hitomi, T. Hayashi, and H. Ogoshi**
Complexation between Reconstituted Myoglobin and Cytochrome *c* / **113**

D37 **A. Harada, Y. Yamaguchi, and M. Kamachi**
Photoinduced Electron Transfer from Porphyrin Incorporated in Antibody Combining Sites to Acceptor Molecules / **114**

D38 **M. Yamada, R. Homma, Y. Ohta, and S. Kawato**
Electron Transfer Interactions of Mitochondrial Cytochrome P450 in Membranes / **115**

D39 **T. Uno, M. Bando, M. Tanigawa, and S. Shimabayashi**
Interactions of Water-Soluble Porphyrin with DNA and RNA Triplexes / **116**

D40 **A. Livoreil, T. Hayashi, J. P. Sauvage, and H. Ogoshi**
Study of Recognition of Amino-Acids by a Bis-Porphyrinic Transition Metal Complex / **117**

D41 **S. Neya and N. Funasaki**
Novel Functional Aspects of the Myoglobin with a Diazaheme Prosthetic Group / **118**

D42 **Y. Yamamoto and E. Kawano**
Functional and Structural Consequences of Heme Orientational Disorder in Myoglobin / **119**

D43 **S. Sakamoto, A. Ueno, and H. Mihara**
Construction of Heme-Binding Two-α-Helix Peptides and Regulation of Binding Property by Peptide Conformation / **120**

D44 **B. Venkatesh, S. Ramasamy, R. Asokan, and P. T. Manoharan**
Hemichromes in Hemoglobin—An EPR Study / **121**

D45 **H. Nishide and E. Tsuchida**
Facilitated Transport of Oxygen through the Membrane of Layered Cobaltporphyrins / **122**

D46 **H. Shimakoshi and Y. Hisaeda**
Electron Paramagnetic Resonance Studies on Cobalt(II) Porphycene and Its Monomeric Oxygen Adduct / **123**

D47 **Y. Nakano, Y. Sugimoto, Y. Inada, and S. Funahashi**
Mechanistic Study of Metalation of 5,10,15,20-Tetraphenylporphyrin in Acetonitrile / **124**

D48 **D. Afzal, R. Baughman, and G. Slaton**
Synthesis, Characterization and Selected Reactions of Yttrium and Yetterbium Porphyrin Complexes / **125**

D49 **T. Ohya and M. Sato**
Mössbauer and Visible Spectra of Iron(III) Complexes of *para*-Substituted Tetraphenylporphyrins—Electronic Effects of Substituents and Axial Ligands / **126**

D50 **U. Simonis, K. Skidmore, E. Louie, and H. Tan**
Substituent Effects in Iron(III) Porphyrin Complexes Probed by Proton and Carbon-13 NMR Spectroscopy / **127**

D51 **M. Nakamura, T. Ikeue, and H. Fujii**
Change in Electron Configuration of Ferric Ion in Bis(cyanide)(*meso*-tetraalkylporphyrinatoiron(III)), $[Fe(TRP)(CN)_2]^-$, Caused by the Nonplanarity of the Porphyrin Ring / **128**

D52 **H. Fujii, T. Yoshimura, and H. Kamada**
Imidazole and Phenolate Complexes of Oxo Iron(IV) Porphyrin π-Cation Radical as Models for Compound I of Peroxidases and Catalases / **129**

D53 **H. Fujii, T. Yoshimura, and H. Kamada**
Intramolecule Spin Coupling of Metalloporphyrin π-Cation Radical Complexes / **130**

D54 **R. Chandra, R. Aneja, A. Sharma, and M. Tiwari**
Retinoic Acid Influences Heme Metabolic Pathway Enzymes / **131**

D55 **R. G. Sajfutdinov, L. A. Sadochina, and E. G. Grigorjev**
Paramagnetic Centres of the Intestinal Content Investigated by the Method of the ESR at the Patients with the Peritonitis / **132**

D56 **M. I. Oshtrakh**
Variations of the Heme Iron Electronic Structure and Stereochemistry in Relation to the Features of Mössbauer Spectra of Hemoglobins / **133**

D57 **M. P. Roach, S. Franzen, P. S. H. Pang, S. G. Boxer, W. H. Woodruff, and J. H. Dawson**
Thiolate Adducts of Cavity Mutant Myoglobin H93G as Models for Cytochrome P450 / **134**

D58 **M. Sono, K. McMillan, L. J. Roman, B. S. S. Masters, and J. H. Dawson**
Tetrahydrobiopterin Requirement for Spectral Reconstitution of Native Intact Neuronal NO Synthase from Its Separated Oxygenase and Reductase Domains / **135**

D59 **O. Blum, A. Haiek, D. Cwikel, Z. Dori, T. J. Meade, and H. B. Gray**
Unfolding Histidine Rich Proteins by Metal Ion Binding: Reaction of Myoglobin with a Co^{III} Complex / **136**

D60 **K. Matsushita, J. Frébortová, T. Yoshikawa, H. Toyama, and O. Adachi**
Function of Multiple Heme *c* Moieties in Intramolecular Electron Transport and Ubiquinone Reduction in the Quinohemoprotein Alcohol Dehydrogenase–Cytochrome *c* Complex of Acetic Acid Bacteria / **137**

(E) Metals in Medicine

E01 **F. González-Vílchez and R. Vilaplana**
Effects Promoted by a New Ruthenium(III) Antitumor Complex on Nucleic Acids, Human Cells and Proteins / **140**

E02 **D. B. Zamble and S. J. Lippard**
Biological Mechanisms of Cisplatin Cytotoxicity / **141**

Preparation and Characterization of Novel High-Valent Manganese Complexes with Various Bidentate Schiff Base Ligands / **199**

G07 **H. Hummel, E. Bill, T. Weyhermüller, K. Wieghardt, R. Davydov, S. Russell, and L. van der Wolf**
New Mixed-Valent Manganese Model Compounds / **200**

G08 **R. R. Othman, T. Weyhermüller, M. Saher, and K. Wieghardt**
Asymmetric Homo- and Heterodinuclear Complexes as Models for the Metalloenzyme Catalase: EPR-Spectroscopy and Electrochemical Investigations / **201**

G09 **S. M. Drechsel, A. S. Mangrich, M. V. Budel, and F. Tavares**
Synthesis and Characterization of a Binuclear Manganese (III,IV) Complex with the Ligand Bis(2-pyridylmethyl)amine, Hbmpa / **202**

G10 **M. Uehara and Y. Abe**
The Catalase Reactivity of Schiff Base Manganese(III) Complexes in N,N-Dimethylformamide / **203**

G11 **M. M. Whittaker, C. A. Ekberg, A. E. Meier, and J. W. Whittaker**
Manganese Redox Metalloenzymes: Mn Superoxide Dismutase and Mn Catalase / **204**

G12 **A. Kawamori, H. Mino, T. Ono, and T. Matsukwawa**
Magnetic Structure of the Mn Cluster in Photosystem II Studied by a Dual-Mode EPR / **205**

G13 **K. Hasegawa, T. Ono, and M. Kusunoki**
Numerical Evaluation of Spin-Exchange Interactions in S_2-State Manganese Tetramer in Photosynthetic Oxygen-Evolving Complex / **206**

G14 **C. Goussias, N. Ioannidis, and V. Petrouleas**
Low Temperature Interactions of NO with the S_1 and S_2 States of the Water Oxidising Complex of Photosystem II. A Novel Mn-Multiline EPR Signal Derived from the S_1 State / **207**

G15 **J. E. Penner-Hahn, T. L. Stemmler, E. Yu, P. DeMarois, and C. F. Yocum**
Structural Characterization of the Mn Sites in Mn Catalase and in the Photosynthetic Oxygen Evolving Complex / **208**

G16 **X.-Y. Li, B. Ye, T. Mak, and I. D. Williams**
Structural Models for the Active Sites of Dimetallic Hydrolases: Synthesis and Characterization / **209**

G17 **N. M. Made Gowda, S. Chandraju, and K. S. Rangappa**
Manganese(III) Oxidation of L-Glutamine in Aqueous Sulfuric Acid, Acetic Acid and Pyrophosphate Media: Kinetics and Mechanism / **210**

G18 **B. S. Sherigara, K. I. Bhat, I. Pinto, and N. M. Made Gowda**
Oxidation of L-Aspartic Acid and L-Glutamic Acid by Manganese(III) in Aqueous Sulfuric Acid, Acetic Acid and Pyrophosphate Media: Kinetics and Mechanism / **211**

G19 **M. S. Newton, B. C. Gilbert, J. R. L. Smith, and J. Oakes**
Hydrogen Peroxide Induced Oxidation of Azo Dyes Catalysed by Manganese 1,4,7-Triazacyclononane Complexes / **212**

(H) Zinc

H01 **P. D. Zalewski, S. Millard, O. Kapaniris, A. Slavotinek, S. F. Lincoln, and A. D. Ward**
The Role of Intracellular Labile Zinc (Zn(II)) in the Control of Apoptosis / **214**

H02 **E. Kimura, T. Koike, T. Watanabe, S. Aoki, T. Gotoh, and M. Shiro**
Novel Zinc(II)-Sensors with Macrocyclic Ligand / **215**

H03 **D. W. Christianson**
Structure–Function Relationships in the Zinc and Manganese Metalloenzymes of Mammalian Nitrogen Metabolism / **216**

H04 **N. Wakao, A. Hiraishi, K. Shimada, M. Kobayashi, S. Takaichi, M. Iwaki, and S. Itoh**
Zinc-Containing Bacteriochlorophyll in Aerobic Acidophilic Bacteria of the Genus *Acidiphilium* / **217**

H05 **K. Nakata and K. Ichikawa**
Enzymatic CO_2 Hydration by Mimicking Zinc(II) Complex for Active Site of Carbonic Anhydrase / **218**

H06 **K. Ogawa, K. Nakata, and K. Ichikawa**
Structure and Enzymatic Function of Novel Model Complex of Carboxypeptidase A Active Site / **219**

H07 **S. Kawabata and K. Ichikawa**
A Study on Model Complex of Cu-Zn SOD. A Role of Zinc(II) Ion in Reduction Process of Cu(II)/Cu(I) / **220**

H08 **L. Cronin and P. H. Walton**
Functional and Structural Model Complexes of Zinc Metalloenzymes Using Ligands Based on *cis,cis*-1,3,5-Triaminocyclohexane / **221**

H09 **H. Kitazawa, E. Suzuki, and T. Kohzuma**
Characterization of a Zinc Protein, Carbonic Anhydrase of the Cyanobacterium, *Synechococcus* sp. PCC7942 / **222**

H10 **T. Tanase, J. W. Yun, and S. J. Lippard**
Biologically Relevant Dicarboxylate- and Phosphate-Ester-Bridged, Non-Redox Active Dimetal Complexes / **223**

H11 **M. Yamami, H. Furutachi, M. Ohba, and H. Okawa**
Bis(p-nitrophenyl)phosphate Adduct of a Zn(II)Pb(II) Complex: A Relevance to Heterobimetallic Phosphatases / **224**

H12 **M. Yashiro, Y. Yamamura, T. Takarada, and M. Komiyama**
Sequence-Specific Hydrolysis of Peptides by Metal Assisted Autocatalysis of an Internal Hydroxy Group / **225**

H13 **G. Kurisu, A. Sugimoto, Y. Kai, and S. Harada**
Structure Analysis of a Zinc Protease from *Streptomyces caespitosus* at 1.0 Å Resolution / **226**

H14 **H. Mori, T. Takahashi, M. Goto, M. Ohta, and Y. Arakawa**
Inhibition on β-Lactam Hydrolyzing Activity of a Metallo-β-Lactamase by Thiol Compounds / **227**

H15 **T. Yamamura, T. Watanabe, A. Kikuchi, T. Yamane, M. Ushiyama, and H. Hirota**
Coordination Conformation Correlation: A Model for Cys-X-Y-Cys/M^{2+} in Proteins / **228**

H16 **S. Sakaida, T. Okamura, N. Ueyama, and A. Nakamura**
Influence of Im NH---O=C Hydrogen Bonding on Peptide Ligand Hydrolysis of $Zn(Z\text{-cys-X-Y-his-OMe})_2$ / **229**

H17 **S. Aoki, T. Koike, E. Kimura, and M. Shiro**
A Tris(Zn^{II}-cyclen) Complex as a New Receptor for Phosphate Dianions in Aqueous Solution / **230**

(I) Bioinspired Homogeneous Catalysis

I01 **W.-D. Woggon and H.-A. Wagenknecht**
Active Site Analogues of Chloroperoxidase—Syntheses, Catalytic Reactions, and Significance to the Reaction Mechanism of CPO / **232**

Specific Interaction of Copper(II) with Some Opiate-Like Peptides Originated from Food / **291**

L07 **X.-F. He, X.-Y. Le, and L.-N. Ji**
Stability of Ternary Copper(II) Complexes Formed by Heteroaromatic N Base and a Biological Buffer (Bicine) / **292**

L08 **T. Hirao, A. Nomoto, S. Yamazaki, T. Moriuchi, and A. Ogawa**
Supramolecular Redox-Active System Consisting of Biomolecule / **293**

L09 **W. J. Puspita, Y. Funahashi, A. Odani, and O. Yamauchi**
Guanidinium-Oxo Anion Hydrogen Bonds in Cu(II)-Dipeptide Complexes / **294**

L10 **H. Kumita, K. Jitsukawa, H. Masuda, and H. Einaga**
NH-π Interaction Characterized in the Co(III) Ternary Complexes with Aromatic Amino Acid / **295**

L11 **S. Ogo, S. Nakamura, H. Chen, K. Isobe, Y. Watanabe, and R. H. Fish**
A New Water Soluble NMR Shift Reagent Based on Molecular Recognition Principles: Non-Covalent π-π Interactions of Water Soluble Aromatic Guest Substrates with a Bioorganometallic Host, $[Cp^*Rh(2'\text{-deoxyadenosine})]_3(OTf)_3$ / **296**

L12 **T. Okamura, K. Baba, N. Ueyama, A. Nakamura, S. Fujii, and T. Yoshimura**
Synthesis of Iron(III) Benzenedithiolate Complexes Having Intramolecular NH---S Hydrogen Bond and NO-Derivatives / **297**

L13 **H. Nagao, Y. Satoh, D. Ooyama, T. Oosawa, and M. Mukaida**
Reduction of Nitrogen Oxide on Ruthenium Complex: Formation of Doubly Bridged Nitrosyl Diruthenium Complex / **298**

L14 **S. Fujii, Y. Suzuki, T. Yoshimura, and H. Kamada**
In Vivo EPR Detection and Imaging of Nitric Oxide Production from a Nitrovasodilator, Isosorbide Dinitrate / **299**

L15 **K. Aoki and A. Sano**
A Model for Metal Ion Capture and Transport by the Antibiotic Lasalocid A: Crystal Structures of Two Polymorphic Cesium Salts / **300**

L16 **A. L. Feig, W. G. Scott, W. DeW. Horrocks, Jr., and O. C. Uhlenbeck**
Kinetic and Spectroscopic Consequences of Site-Specific Terbium(III) Binding to the Hammerhead Ribozyme / **301**

L17 **K. Ogino, M. Sawa, Y. Shirao, and M. Kudo**
Hydrolytic Activities of Three Component Complexes of NTPs and Plasmid DNA · Ligands · Metal Ion / **302**

L18 **T. Haneda, Y. Inomata, and F. S. Howell**
Characterization and Crystal Structures of Bivalent Metal Complexes with Quinic Acid / **303**

L19 **T. Onaka, M. Nakagoshi, I. Kinoshita, K. Shibata, M. Doe, J. Fujii, T. Tanase, and S. Yano**
Synthesis and Characterization of μ-Peroxo Dinuclear Cobalt(III) Complexes Containing Sugars / **304**

L20 **N. M. Made Gowda and J. Zhang**
Rhenium(V) Chloride Complexes of N-Alkylphenothiazines: Synthesis and Characterization / **305**

L21 **M. Izumi and K. Ichikawa**
Kinetics among Mg^{2+} Bound Complexes of Phenyl Phosphatosulfate as a Model of the Substrate of Sulfate-Activating Enzyme / **306**

L22 **Y. Matsushima and Y. Nagata**
A Quinonoid Intermediate Species Absorbing in the 500-nm Region in Al(III)-Catalyzed Pyridoxal Catalysis / **307**

L23 **Y. Funahashi and O. Yamauchi**
Metal(II) Complexes with a Pterin-Containing Ligand as a Metal-Pterin Binding Model for Aromatic Amino Acid Hydroxylases / **308**

L24 **Y. Shimazaki, H. Yokoyama, M. Takani, S. Hirota, and O. Yamauchi**
Model Studies on the Reactivities of Aromatic Rings at Enzyme Metal Sites / **309**

(M) Non-Heme Iron

M01 **E. I. Solomon, E. G. Pavel, K. E. Loeb, and J. Zhou**
Active Sites in Non-Heme Iron Enzymes: Geometric and Electronic Structure/Function Correlations / **312**

M02 **R. C. Stevens, K. G. Goodwill, C. Sabatier, and F. Fussetti**
Crystal Structure of Tyrosine and Phenylalanine Hydroxylase Catalytic Domain / **313**

M03 **J. D. Lipscomb, J. C. Nesheim, S.-K. Lee, B. J. Wallar, and X. Y. Zhang**
Structure and Reactivity of Intermediates in the Oxygen Activation Mechanism of Methane Monooxygenase / **314**

M04 **M. Suzuki**
Reactivity of Diiron(II) Complexes with Molecular Oxygen / **315**

M05 **A. Gräslund**
Diiron-Oxygen Clusters and Free Radicals in Ribonucleotide Reductase / **316**

M06 **K. R. Strand, M. A. Hanson, P. P. Schmidt, A.-L. Barra, E. I. Solomon, L. Thelander, A. Davydov, A. Gräslund, and K. K. Andersson**
Studies of Active and Co-Subsituted R2 Subunit of Ribonucleotide Reductase from Mouse / **317**

M07 **Y. Taniike, M. Kodera, and K. Kano**
Synthesis of Peroxodiiron(III) Complexes of Polypyridine Ligands as sMMO Compound P Models / **318**

M08 **K. Umakoshi, Y. Tsuruma, A. Takasawa, H. Yasukawa, C.-E. Oh, and Y. Sasaki**
Synthesis and Properties of Amino Acid-Bridged Dinuclear Iron(III) Complexes / **319**

M09 **H. Masuda, K. Tanabe, T. Miwa, M. Harata, K. Jitsukawa, and H. Einaga**
Newly Designed Dinuclear Iron Complex That Enable to Reversibly Bind Dioxygen Molecule / **320**

M10 **R. Y. N. Ho, Y. Dong, S. Yan, J. E. Bol, W. L. Driessen, B. Maase, J. Reedijk, and L. Que, Jr.**
Spectroscopic Characterization and Reactivity Studies of a Diiron- and Dicopper-Peroxo Species / **321**

M11 **B. Krebs, T. Klabunde, N. Sträter, H. Witzel, R. Than, and B. Sift**
Mechanism of Plant and Mammalian Purple Acid Phosphatases Based on Crystal Structures / **322**

M12 **K. Yoshizawa, T. Ohta, T. Yamabe, and R. Hoffmann**
A Theoretical Study of Dioxygen Cleavage on Diiron Enzyme Models / **323**

M13 **S. Wada, M. Iwase, Y. Watanabe, K. Jitsukawa, H. Masuda, and H. Einaga**
Ligand Oxidation by Activation of Hydrogen Peroxide with Non-Heme Iron(III) Complex / **324**

M14 **T. Funabiki, T. Yamazaki, A. Fukui, T. Tanaka, and S. Yoshida**
Development of Oxygenative Cleavage of Chlorocatechols by Functional Model Complexes for Chlorocatechol Dioxygenases / **325**

M15 **J. H. Lim, J. J. Kim, K.-B. Lee, and H. G. Jang**
A New Functional Model of Catechol Dioxygenases: Property and Reactivity of [Fe(BLA)DBC]BPh_4 / **326**

M16 **H. Kurosaki, Y. Ishikawa, M. Goto, H. Matsuo, M. Sugiyama, and E. Kimura**
DNA Cleavage by Iron(III) Complex of Synthetic Bleomycin Model Compound / **327**

M17 **T. Arai, K. Shinozuka, and H. Sawai**
The Kinetic Analysis of the Redox Reaction of the Simplified Bleomycin Model Fe-Complex / **328**

M18 **Y. Ishikawa, T. Ishihara, Y. Morishita, A. Yamamoto, H. Kurosaki, H. Mori, M. Goto, H. Matsuo, and M. Sugiyama**
DNA Cleavage Activity with a Novel Pentadentate Iron(II) Complex and Spectroscopic Property of Its Active Intermediate / **329**

M19 **K. Miki and T. Furuya**
Catalytic Hydroxylation of Alkanes by Immobilized Mononuclear Iron Carboxylate / **330**

M20 **R. S. Kayyali, J. B. Porter, and R. C. Hider**
Inhibition of Iron-Containing Metalloenzymes by 3-Hydroxypyridin-4-one Chelators / **331**

M21 **T. Noguchi, M. Odaka, M. Hoshino, M. Tsujimura, Y. Inoue, and I. Endo**
Photodissociation of Nitric Oxide from the Non-Heme Iron Center Activates Nitrile Hydratase from *Rhodococcus* sp. N-771: FTIR and Resonance Raman Evidence / **332**

M22 **M. Odaka, K. Fujii, M. Hoshino, T. Noguchi, M. Tsujimura, S. Nagashima, M. Yohda, T. Nagamune, Y. Inoue, and I. Endo**
Activity Regulation of Photoreactive Nitrile Hydratase from *Rhodococcus* sp. N-771 by Nitric Oxide / **333**

M23 **S. Nagashima, M. Nakasako, N. Kamiya, M. Yohda, M. Odaka, T. Ueki, and I. Endo**
X-Ray Crystallographic Analysis of Photoreactive Nitrile Hydratase / **334**

M24 **M. Tsujimura, N. Dohmae, M. Chijimatsu, K. Takio, M. Odaka, M. Yohda, M. Hoshino, S. Nagashima, and I. Endo**
Photoreactive Nitrile Hydratase: Posttranslational Modification of Photoreactive Site / **335**

M25 **T. Senda, K. Sugimoto, T. Nishizaki, T. Yamada, M. Okano, E. Masai, M. Fukuda, and Y. Mitsui**
Structural Studies on the "BPHC" Enzyme—A Non-Heme Iron Dioxygenase from a Pseudomonas sp. / **336**

M26 **T. E. Elgren, T. L. Stemmler, A. T. Marcoline, J. I. Goldstein, A. Bomann, and J. Penner-Hahn**
Probing the Catalase Activity Associated with the R2 Protein of Ribonucleotide Reductase from *E. coli* / **337**

(N) Metals, Nucleic Acids, and Gene Regulation

N01 **B. Lippert**
Creating Regular Arrangements of Nucleobases through Metal Ion Coordination and H Bond Formation / **340**

N02 **M. Komiyama, M. Yashiro, A. Ishikubo, A. Kajimura, M. Ohno, and J. Sumaoka**
DNA and RNA Hydrolysis by Metal Complexes for Artificial Pin-Point Restriction Enzymes / **341**

N03 **J. E. Coleman, K. K. Rodgers, M. Junker, K. H. Gardner, S. F. Bellon, and T. A. Steitz**
Zinc as a Structural and Folding Element of Proteins Which Interact with DNA / **342**

N04 **S. Mahadevan and M. Palaniandavar**
Spectroscopic and Voltammetric Studies on Copper Complexes of 2,9-Dimethyl-1,10-phenanthrolines Bound to Calf Thymus DNA / **343**

N05 **M. Chikira, K. Sakamoto, and W. E. Antholine**
Orientation of Iron(III) and Nitrosyl Iron(II) Bleomycin on DNA-Fibers / **344**

N06 **C. Ikeda, S. Ichimoto, N. Yoshioka, and H. Inoue**
Interaction of Water-Soluble Chlorophyll Derivatives with DNA / **345**

N07 **M. Shionoya, A. Ojida, M. Shiotsuka, M. Tasaka, and K. Tanaka**
Metal Complexes Targeting AT-Cluster Domains of Double-Stranded DNA / **346**

N08 **T. Tanaka, Y. Usui, and Y. Fujii**
Cationic Schiff Base Complexes of Copper(II) and Nickel(II) as New Selective DNA Binder / **347**

N09 **M. Chikuma, M. Hirai, S. Komeda, Y. Kimura, and K. Kumakura**
Interaction of Bisplatinum Complex Containing μ-Hydroxo-μ-pyrazolato Structure with GC-Rich DNA / **348**

N10 **K. Sakai and T. Tsubomura**
Synthesis, Characterization, and Interactions with DNA of a New *cis*-Diamminedichloroplatinum(II)-Derivative Having a Polypyridyl Ruthenium(II) Emitter / **349**

N11 **Z. Ďuračková, L. Novotný, A. Liptáková, I. Dovinová, and J. Labuda**
The Cu(II) Complex with Tetraaza Macrocyclic Ligand as a DNA Modulator and an Antineoplastic Agent / **350**

N12 **A. Caubet, M. Haj, V. Moreno, and E. Molins**
Pd(II) and Pt(II) Methionine-Nucleobases Ternary Complexes / **351**

N13 **M. Mizutani, I. Kubo, K. Jitsukawa, H. Masuda, and H. Einaga**
Specific Non-Covalent Interligand Interactions in Palladium(II) and Copper(II) Ternary Complexes with Nucleobase Amino Acids and Bipyridine / **352**

N14 **T. Kobayashi, S. Ito, S. Ohba, and Y. Nishida**
DNA Degradation by Metal Complex/Hydrogen Peroxide Systems / **353**

N15 **C.-C. Cheng, Y.-L. Lu, and C.-J. Lo**
Novel Functionalized and Water-Soluble Ruthenium-Salen Complexes in DNA Stranded Scission / **354**

N16 **J. Matsunami and K. Matsumoto**
Photoinduced DNA Cleavage by Amidate-Bridged Dinuclear Platinum(III) Complexes / **355**

N17 **F. Sakamoto, T. Sumiya, T. Fukuda, and Y. Fujii**
DNA Photocleavage by Cationic Schiff Base Complexes of Manganese(III) / **356**

N18 **M. Tabata and A. K. Sarker**
Photo-Chemical Cleavage of Supercoiled Plasmid DNA by Mercury(II) Complex of Tetrakis(1-methylpyridinium-4-yl) Porphyrin / **357**

N19 **B. Zhu, X.-M. Li, D.-Q. Zhao, and J.-Z. Ni**
The Hydrolysis of Nucleic Acid by Lanthanide Complexes / **358**

N20 **T. Ohmichi and N. Sugimoto**
New Combination of Metal Ions Can Improve a Ribozyme System / **359**

N21 **T. Itoh, H. Hisada, T. Sumiya, M. Hosono, Y. Usui, and Y. Fujii**
Effective DNA Hydrolysis by Copper(II)-*cis*,*cis*-1,3,5-Triaminocyclohexane Complex / **360**

N22 **J. Sumaoka, A. Kajimura, M. Ohno, and M. Komiyama**
Homogeneous Metal Complexes for DNA Hydrolysis and Their Application to Artificial Restriction Enzymes / **361**

N23 **S. Aono, K. Okubo, T. Matsuo, M. Okada, and H. Nakajima**
A Carbon Monoxide Dependent Transcriptional Regulator Which Contains b-Type Heme as a Carbon Monoxide Sensor / **362**

N24 **B. K. Burgess and S. M. Yannone**
Ferredoxin I Specifically Controls SoxS-Like Activation of FPR in *Azotobacter vinelandii* / **363**

N25 **H. Torigoe, H. Tsutsui, Y. Nagawa, H. Nakanishi, A. Sarai, and K. K. Yokoyama**
Interaction of the Zinc Finger Protein MAZ with the (G-G:C) Typed Triplex DNA / **364**

N26 **R. W. Frazee and T. D. Tullius**
Chimeric Homeodomains Reveal the Importance of the N-Terminal Arm in Determining the Structural DNA Binding Characteristics of Dfd and Ubx Homeodomains / **365**

N27 **T. Ohkubo, H. Sakashita, Y. Akitomo, and K. Morikawa**
NMR Studies of the Methylation Dependent Functional Switch Mechanism of the *Escherichia coli* Ada Protein / **366**

N28 **V. G. Bregadze, I. G. Khutsishvili, J. G. Chkhaberidze, and E. Z. Mchedlishvili**
Metal Ions Induced Proton Transfer in DNA Duplex: UV Spectroscopic Display / **367**

N29 **J. Kim, H. H. Thorp, S. Kumar, and R. J. Roberts**
Effect of Base Flipping on Guanine-Metal Electron Transfer / **368**

N30 **S. Kuusela**
The Effect of the Molecular Environment on the Zn^{2+} Promoted Hydrolysis of RNA Phosphodiester Bonds / **369**

N31 **H. Tanaka and R. Kuroda**
DNA Sequence-Specific Structure and Flexibility Probed by Induced CD Spectroscopy of Porphyrins / **370**

(O) Environmental Bioinorganic Chemistry

O01 **M. Costa, K. Salnikow, Y.-W. Lee, and D. Zhou**
Molecular Biology of Nickel Carcinogenesis / **372**

O02 **H. Sakurai**
Copper-Metallothionein Induction and Free Radical Formation in LEC Rats / **373**

O03 **A. Takatsu and A. Uchiumi**
Direct Observation of Trace Aluminum for Studies of Aluminum Accumulation in Fish Living in Naturally Acidified Lake / **374**

O04 **T. Hino, C. Kiyoka, and H. Sakurai**
Aluminum Enhances Fe^{2+}-Induced Lipid Peroxidation / **375**

O05 **H. Arakawa, N. Watanabe, R. Tamura, and C. P. Rao**
Chromium(VI)-Reducing Ability in Withered Oak Leaves / **376**

O06 **Y. Inoue and Y. Kanzaki**
The Mechanism of Antibacterial Activity of Silver-Loaded Zeolite / **377**

O07 **A. Odani, R. Takamido, and O. Yamauchi**
Phytate, an Environmental Phosphate from Grain Source. Metal Complex Formation and Degradation by Phytase / **378**

O08 **M. Umeno, K. Yanagita, I. Sagami, and T. Shimizu**
Azo Reduction Catalyzed by Cytochrome P450 1A2 and NADPH-Cytochrome P450 Reductase / **379**

O09 **K. Yanagita, I. Sagami, and T. Shimizu**
Distal Site and Surface Mutations of Cytochrome P450 1A2 Markedly Enhanced Dehalogenations of Chlorinated Compounds / **380**

O10 **Y. Dong, Y. Wang, and D. Ma**
Highly Sensitive and Selective Methods for Identifying and Determining Copper(II) with N-Phenyl-N′-Sodium Sulfanilate Thiourea / **381**

(P) Vanadium

P01 **D. C. Crans**
Properties of High Oxidation State Vanadium Containing Complexes; Solid State Structure, Solution Structure, Stability and Lability / **384**

P02 **R. Wever, W. Hemrika, R. Renirie, P. Barnett, A. Messerschmidt, and H. L. Dekker**
From Vanadium Chloroperoxidases to Phosphatases, the Same Architecture for the Active Site? / **385**

P03 **C. Orvig**
Insulin-Mimetic Vanadium Complexes / **386**

P04 **L. Pettersson and K. Elvingson**
Speciation in Vanadium Bioinorganic Systems / **387**

P05 **J. Costa Pessoa, T. Gajda, S. M. Luz, T. Kiss, J. J. G. Moura, and I. Torok**
The System Gly-L-Asp + VO^{2+} and Related Ligands; a Potentiometric and Spectroscopic Study / **388**

P06 **J. Costa Pessoa, M. T. Duarte, J. J. R. Fraústo da Silva, R. D. Gillard, C. Madeira, P. M. Matias, and I. Tomaz**
Unusual Product Obtained from [VO(Sal-L-Trp)(H_2O)] in H_2O/Pyridine Solutions / **389**

P07 **K. Oyaizu, K. Yamamoto, and E. Tsuchida**
Role of Multinuclear Complexes in Coordination and 4-Electron Reduction of Dioxygen / **390**

P08 **K. Kanamori, Y. Kinebuchi, and H. Michibata**
Reduction of Vanadium(IV) to Vanadium(III) by Cysteine Methyl Ester in Water in the Presence of Amino Polycarboxylates / **391**

P09 **K. Fukui, H. Ohya-Nishiguchi, and H. Kamada**
Pulsed EPR Study of Imidazole-Coordinated Oxo-Vanadium(IV) Complexes Relevant to the Active-Site Structure of Vanadium Bromoperoxidase / **392**

P10 **C. P. Rao and A. Sreedhara**
Biomimetic and Biointeraction Studies of Vanadium: Role of Oxovanadium Complexes / **393**

P11 **N. Susa, A. Sreedhara, and C. P. Rao**
Vanadate and Chromate Reduction by Saccharides and L-Ascorbic Acid: Effect of the Isolated V(IV) and Cr(III) Products on DNA Nicking, Lipid Peroxidation and Cytotoxicity / **394**

P12 **T. Kiss, E. Kiss, G. Micera, and D. Sanna**
The Insulin Mimetic Complex $VO(Malt)_2$ in Body Fluids / **395**

P13 **Y. Fujisawa, S. Fujimoto, and H. Sakurai**
Structure–Activity Relationship of Insulin-Mimetic Vanadyl Complexes / **396**

(Q) Electron and Energy Transfer

Q01 **M. Bruschi, L. Florens, A. Dolla, and C. Aubert**
Structure Function Relationships within the Multihemic Cytochrome c_3 Superfamily/ **398**

Q02 **N. M. Kostić**
Dynamic Processes Gating Electron-Transfer Reactions of Plastocyanin with Cytochromes / **399**

Q03 **K. Bernauer**
Stereo- and Site Selection by Enantiomers in Electron-Transfer Reactions Involving Native and Recombinant Metalloproteins / **400**

Q04 **G. M. Ullmann, E.-W. Knapp, and N. M. Kostić**
Electron Transfer in the Plastocyanin-Cytochrome *f* and Cytochrome c_6-Cytochrome *f* Complex / **401**

Q05 **S. Hirota, M. Endo, C. Maeno, T. Hibino, T. Takabe, and O. Yamauchi**
Lysine Peptide Binding to Plastocyanin and Negative Patch Mutants and Its Effect on Electron Transfer / **402**

Q06 **T. Hibino, Y. Tanaka, H. Ishikawa, O. Yamauchi, and T. Takabe**
Electron Transfer from Negative Patch Mutant Plastocyanin to Photosystem I Complexes from Cyanobacteria, Green Algae, and Plants / **403**

Q07 **A. Itaya, H. Sugawara, M. Nakakomi, A. Nagasawa, T. Kohzuma, and S. Suzuki**
Kinetic Study on the Electron Transfer Reactions of Metalloproteins with Cobalt Complexes / **404**

Q08 **Y.-L. Sun, Y.-H. Wang, M.-M. Yan, Y. Xie, Z.-X. Huang**
Interaction and Electron Transfer between Cytochrome b_5 and Cytochrome c / **405**

Q09 **W. D. Horrocks, Jr., J. P. Bolender, Jr., W. D. Smith, R. M. Supkowski, and L. E. L. Reynolds**
Lanthanide Ions as Redox Probes of Long-Range Electron Transfer in Proteins / **406**

Q10 **T. Akashi, T. Ideguchi, K. Kobayashi, S. Tagawa, and T. Hase**
Analysis of Protein-Protein Interaction and Electron Transfer between Plant Ferredoxin and Sulfite Reductase by Site-Directed Mutagenesis / **407**

Q11 **A. I. Kotelnikov, V. R. Vogel, A. V. Pastuchov, and V. L. Voskoboinikov**
The Role of Protein Molecular Dynamics in the Electron Transfer Reactions / **408**

Q12 **K. Tsukahara, M. Matsui, and T. Sakurai**
Preparation and Characterization of Myoglobin Modified with Diethylenetriaminepentaacetato-Cobaltate(III) / **409**

Q13 **T. Ohmura, E. Harada, Y. Tachibana, G. Kawai, K. Watanabe, and H. Akutsu**
The Role of Heme Axial Histidyl Imidazole on the Redox Potentials of Cytochrome c_3 / **410**

Q14 **Y. Amao, T. Kamachi, and I. Okura**
Photoinduced Hydrogen Evolution with Water Soluble Viologen Linked Zinc-Porphyrins and Hydrogenase / **411**

Q15 **Y. Sugiyama, S. Takahashi, K. Ishimori, and I. Morishima**
Pressure Dependence of Electron Transfer Rates in Ruthenium Modified Myoglobin Reconstituted by Zinc Porphyrin / **412**

Q16 **T.-C. Tsai and I.-J. Chang**
Side Chain Affects Electron Tunneling Rates across Amino Acid / **413**

Q17 **T. Fujiwara, T. Akiyama, and Y. Fukumori**
Large-Scale Purification and Structural Features of *Paracoccus denitrificans* (ATCC 35512) NO Reductase / **414**

Q18 **T. Ishii, Y. Nagano, T. Yamamoto, and K. Uehara**
Effect of Homolog for Aggregation of Bacteriochlorophyll *c* in Chlorosomes of Green Sulfur Bacteria / **415**

Q19 **T. Ema, S. Misawa, S. Nemugaki, T. Sakai, and M. Utaka**
New Optically Active Diporphyrin Having a Chiral Cyclophane as a Spacer / **416**

Q20 **C.-S. Choi, L. Mishra, and K. Araki**
Novel Design of Dinuclear Ru(II) Complexes Having Bridging Ligands of Rigid and Extended Structures / **417**

Q21 **Y. Sasaki, C. Koshi, C. Matsunami, K. Umakoshi, N. Ueda, and M. Yamasaki**
Proton-Coupled Redox Reactions of Oxo-carboxylato-Bridged Dimetal Center of Metalloenzymes as Studied by Ruthenium(III) and Osmium(III) Model Complexes / **418**

Q22 **M. Abe, T. Mikami, H. Sugimoto, K. Umakoshi, A. Nagasawa, D. M. Saysell, A. G. Sykes, and Y. Sasaki**
Multistep Electron-Transfer Properties of Mononuclear *trans*-Oxohydroxo Rhenium(V), Oxo-Centered Trinuclear Ruthenium(III,III,III), and -(II,III,III) Complexes with Coordinated Imidazoles / **419**

Q23 **S. Ananda, M. B. Jagadeesha, and N. M. Made Gowda**
Ruthenium(III) Catalyzed Oxidation of Primary Amines by Bromamine-T in HC1 Medium: A Kinetic and Mechanistic Study / **420**

Q24 **N. Koshino, H. D. Takagi, and S. Funahashi**
Oxidation Reaction of Hydrogen Peroxide by Outer-Sphere Oxidizing Reagents in Acidic Aqueous Solution / **421**

Q25 **S. Fukuzumi, K. Yasui, T. Suenobu, and S. Itoh**
Highly Efficient Catalysis of Scandium Ion on Reduction of Carbonyl Compounds by NADH Analogues / **422**

(R) Specific Application of Spectroscopy

R01 **K. O. Hodgson, B. Hedman, and H. H. Zhang**
Structural Studies of Multinuclear Metal Active Sites in Proteins Using X-Ray Absorption Spectroscopy / **424**

R02 **F. Neese, W. G. Zumft, W. E. Antholine, and P. M. H. Kroneck**
Novel Binuclear Copper Chromophores in Biology: The Cu_A and Cu_Z Sites in Bacterial Nitrous Oxide Reductase / **425**

R03 **M. Lim, T. A. Jackson, and P. A. Anfinrud**
Time-Resolved IR Spectroscopy of Photolyzed MbCO: Probing Ligand Dynamics from Femtoseconds to Microseconds / **426**

R04 **S. A. Dikanov, D. S. Patil, and M. K. Bowman**
ESEEM Spectroscopy of the Metal Centers in Nickel-Iron Hydrogenase from *Desulfobrio gigas* / **427**

R05 **T. Ogura, M. Aki, and T. Kitagawa**
A Third-Generation UV Resonance Raman Spectrophotometer Using a Solar-Blind ICCD and a Quasi-CW UV Light Source for Biological Applications / **428**

R06 **J. Yuan, G. Wang, H. Kimura, and K. Matsumoto**
Synthesis of a New Tetradentate β-Diketonate Europium Chelate and Its Application for Protein Labeling and Highly Sensitive Time-Resolved Fluoroimmunoassay / **429**

R07 **W. Meyer-Klaucke, H. Paulsen, M. Gerdan, S. Schwendy, H. Winkler, A. X. Trautwein, H. F. Nolting, and H. Toftlund**
The High-Spin / Low-Spin Transition in $Fe(tpa)(NCS)_2$ Studied by X-Ray Absorption Spectroscopy, Susceptometry and Molecular Orbital Calculations / **430**

R08 **H. Grünsteudel, A. I. Chumakov, H. F. Grünsteudel, A. Q. R. Baron, R. Rüffer, A. X. Trautwein, H. Winkler, and H. Toftlund**
Nuclear Resonant Scattering by the Spin-Crossover Compound $Fe(tpa)(NCS)_2$ / **431**

R09 **J. Teraoka, F. Ibe, T. Tanaka, Y. Kyogoku, and H. Sugeta**
Vibrational Circular Dichroism in Hemoprotein Ligands / **432**

R10 **Y. Hoshika, T. Akahira, K. Taguchi, Y. Nihei, B. Tomiyasu, K. Yamasaki, H. Sakano, and F. Nagawa**
Trace Element Imaging of Human, Dog and Mouse Olfactory Specimens / **433**

(S) Biologically Relevant Systems

S01 **Z. Bingjian and Z. Xiaoli**
The Stabilizer of Macromolecular Metal Complexes for Pearl Bleaching / **436**

S02 **Q. Liu**
The Coordination Chemistry in the Metal Proteins Separated from Snake Venom / **437**

S03 **M. Balbaa, M. Khalifa, M. El-Sabaway, and K. Kandeel**
An Iron(II) Macrocyclic Complex Acts as a Potent Inhibitor of Succinate-Cytochrome *c* Reductase / **438**

S04 **Y. Masuda, J. Tanaka, and A. Yoneda**
Stability Constants of Metal Complexes with Various 2-Substituted 8-Quinolinols / **439**

S05 **K. Tsuge, M. Kurihara, S. Daniele, and K. Tanaka**
Electronic Structure of Ruthenium-Dioxolene-Terpyridine Complexes / **440**

S06 **H. Matsuzaka, K. Ariga, T. Kamura, and S. Kitagawa**
Synthesis, Structure and Reactivity of Novel Amido-Bridged Dinuclear Rhodium and Iridium Complexes / **441**

S07 **T. Yoshikuni and Y. Takeuchi**
Oxidative Coupling by Cerium Compounds / **442**

S08 **J. Sawai, H. Kojima, N. Ishizu, M. Itoh, H. Igarashi, T. Sawaki, and M. Shimizu**
Bactericidal Action of Magnesium Oxide Powder / **443**

S09 **A. K. Singh and S. Chandra**
A Quadridentate Macrocyclic PVC Based Membrane Sensor for Magnesium / **444**

S10 **K. Fukasaku, K. Takeda, and K. Shiraishi**
Theoretical Studies on Electronic Structures of Protein Nanotubes / **445**

S11 **K. Waizumi, M. Kitajima, T. Morita, and N. Fukushima**
Structural and Energetic Investigations of $[ML(H_2O)_5]^+$ by Density Functional Calculations (M = Zn^{2+}, Ca^{2+}, and Cd^{2+}; L = His and Glu) / **446**

S12 **S. Iwata, H. Suda, and K. Tanaka**
The Logical Cation AND Anion Recognition of Pyrido[1′,2′:1,2]imidazo[4,5-b]pyrazine Fluorophore-Host / **447**

S13 **J. Ohkanda, H. Shibui, and A. Katoh**
Synthesis of Homocalix[3]arene Bearing Hydroxypyrazinone and Its Cooperative Molecular Recognition by Metal-Mediated Allosteric Effect / **448**

S14 **M. Amakawa and H. Tamiaki**
Self-Aggregation of Synthetic Cadmium Chlorin / **449**

S15 **H. Ueda, Y. Yamamoto, K. Miyamura, and Y. Gohshi**
Control of the Aggregation Structure of $[Ni(dmit)_2]$ Utilising the Tendency of Artificial Lipid to Form Bilayer Membrane / **450**

S16 **M. Tadokoro, H. Kanno, K. Matsumoto, K. Isobe, and K. Nakasuji**
Molecular Recognition and Self-Assembly by Hydrogen Bonding Metal Complexes: Unprecedented Supramolecular Helicate Structures / **451**

S17 **N. Ohata, H. Masuda, and O. Yamauchi**
Process of Self-Organization of Metal(II)-Arginine-Dianion Systems in Solution. An NMR Study / **452**

S18 **R. V. Belosludov, Z.-Q. Li, and Y. Kawazoe**
Theoretical Study of Structures, Energetics, and Electronic Properties of Small Urea Clusters by *ab Initio* Calculations / **453**

S19 **K. Miyoshi and T. Kitao**
Cleaving Activity of DNA by 1:1 Reduced Glutathione-Fe(II) Complex without Reductant / **454**
